The project features two pools including a 25 yard x 35 meter deep-water competition pool equipped with diving boards and a fully accessible adaptive PE pool equipped with an accessible ramp and exercise parallel bars. The Pool complex includes a 2,850 SF pool building with restrooms, pool equipment room, storage, a first-aid station and ticket office. New bleachers and an electronic scoreboard were also installed in addition to new landscaping, hardscape areas and new fencing and gates. A heat exchanger uses waste heat from the central plant to supplement pool heating in addition to a back-up boiler.

The Pool Building consists of concrete masonry construction; exterior finishes include cement plaster and corrugated metal panels. An aluminum storefront system was used for exterior windows and doors. The site area, including the two pools, a bathhouse and a deck area, totals over 40,000 SF in size.

Client:
Cerritos Community College District

Location:
Norwalk, CA

Size:
2,850 SF Pool Building

Cost:
\$5,000,000

Completed:
November 2009
